

Griffin RESA Coaching Endorsement Winter 2022

Coaches are agents of change, supporting and improving the performance of their colleagues, improving teamwork among staff, and increasing the commitment of others to the goals of the system/school improvement plan—all of which result in improving student achievement.

Using a cognitive coaching model, with particular attention to authentic practices for effecting coaching in coaches, this endorsement provides the skills and knowledge to bring about positive change in the school setting. This Endorsement is completely virtual.

In the first course, Skills of Effective Coaching, participants will self-assess their knowledge, skills, and dispositions to become effective coaches, engage in exploring and understanding effective coaching practices including various coaching styles, social-emotional strategies for educators, impactful communication and cultural proficiency. Candidates will improve their skills in data analysis and decision-making, as well as goal development to improve teaching practice.

The second and third courses run concurrently at the conclusion of Course 1 and consist of coaching practice in the school/system setting, to include planning and implementing effective Professional Learning Communities.
