Enhancing Vocabulary Using Brain-Based Instruction

Do you think your vocabulary instruction is in a rut? Does your cycle of vocabulary instruction look the same every week? If so, then neuro-education and brain research to the rescue!

Educators will explore how the three regions of the brain impact the memory pathways of the learners (TKES/TAPS 1). Through Sprenger's cycle for the three stages of memory development (2017), participants will explore an improved sequence of instruction that impacts students' long-term memory of vocabulary concepts (TKES/TAPS 2).

The instructor will guide hands-on experiences for new classroom-ready activities that support a student-centered environment, improving engagement (TKES/TAPS 8) and reading comprehension (TKES/TAPS 2).

Date:	December 1 st , 2022
Time:	8:30am – 3:30pm
Location:	Griffin RESA
Cost:	\$35 (Registration is required)
Target Audience:	K-12 th Teachers

Register online at www.griffinresa.net
Registration Deadline: **November 24th, 2022**
