Evidence-Based Best Practices for the K-12 Math Classroom

What evidence-based instructional practices can be employed to support the learner's growth and development?

What instructional practices can a teacher employ to help the learner master this big idea?

Students need to engage in hands-on, evidence-based practices to deepen student learning. Instructional strategies to support the eight Standards for Mathematical Practice and the Mathematics Georgia Standards of Excellence content standards should also be included in all lessons. The evidence-based practices presented in this workshop will provide classroom teachers with specific strategies for teaching and learning at each grade level.

Date:	June 8, 2022
Time:	9:00 AM-3:30 PM
