Extending Number Talks: Fractions, Decimals and Percentages *for the K-5th Classroom*

You have heard of Number Talks; now it is time to tackle fractions, decimals and percentages by extending what students have experienced in whole number talks to the more complex and confusing topic of rational numbers.

Teachers will learn how to apply the mathematical practices of reasoning and problem solving as well as constructing viable arguments to help students clear up common misconceptions and errors when working with fractions, decimals, and percentages.

Come and learn how to take your students beyond just learning “rules” and only presenting one way of solving problems to learning different approaches, valuing different ways of thinking and placing sense making at the forefront of creating rich mathematical discourse in your classroom.

Date: January 20, 2022

Time: 8:30 AM -3:30 PM

Location: Griffin RESA

Cost: \$35

Target Audience: K-5 Teachers, Paraprofessionals, and Coaches
