# Fundamentals of Feedback

“The only important thing about feedback is what students do with it”, says Dylan William in his April 2016 article, *The Secret to Effective Feedback* (Educational Leadership). Does feedback matter that much? How do we give and receive feedback that makes a difference? In this class, we will delve into the fundamentals of feedback and how to set you and your students up for using feedback to increase student learning. We will also look at how feedback may look different as we engage in traditional settings versus virtual settings.

This class supports teachers’ professional learning goals to meet standards 2, 5, and 7 of TKES as they connect instructional planning, assessment, and a positive learning environment. Instructor will share strategies and resources to implement in the school setting that support all students including struggling students and diverse learners, ensuring a job-embedded professional learning experience that will positively impact student learning.
