Student Engagement for the 21st Century Classroom

The cornerstone of a true 21st Century classroom is student engagement. In this course you will discover how to see teaching through this “engagement lens,” how to easily establish this type of environment in your classroom, as well as learn various engagement techniques to make it happen.

From quality “turn and talk” to the “jigsaw method” and the “fishbowl,” you will walk away with these plus 53 other engagement technique suggestions that you can infuse immediately in your daily classroom routine.

Along the way you will feel more confident in knowing how to help your students generate higher level thinking questions and quality communication and collaboration so no matter what subject or grade level you teach you can make your dream 21st century classroom a reality.

The instructor will share strategies and resources that support TKES Standards 2,3,7, & 8 with practical takeaways that will positively impact teacher practice and student achievement.
